FROM RESEARCHES AND PIONEERS TO INDUSTRY LEADERS

- NODA is a Swedish born **innovative DeepTech SaaS** company with patented technology and proven solutions to accelerate the uptake of digital intelligence on the energy market
- Enables **energy companies, property owners and industrial partners** to accelerate and excel at their transition to radically more efficient energy systems by providing digital solutions for advanced decision-making and control within demand, supply and distribution
- Specialises in **district and local energy in distribution networks**, heating/cooling, HVAC, heat pumps, gas, geothermal and other applications within thermal and distributed grids
- NODA deploys **20 years** of digital and thermal excellence in a matter of **hours** increasing infrastructural capacity by **15%** and thus minimising fossil dependence and **optimizing usage of scarce resources**
- Integrated in energy systems and infrastructures throughout **Europe, Asia and North America**

Project involvement

- NODA has been involved in many EU projects through the years. Currently we are part of the following projects.
 - <https://collectief-project.eu/>
 - <https://enflate.eu/>
 - <https://tinyurl.com/2ym2hdsz>
 - <https://a.bth.se/hints/>
- NODA normally acts as a “bridge” between low and high TRL’s. Between technology and product.
- NODA provides solutions in sector coupling, grid optimisation and customer integration.
- We want to further develop business models to enable scalability in relation to customer/utility interaction, policy management and regulatory considerations.

**MAKING THE RIGHT CHOICE.
ALWAYS!**
